

NEW WILDFLOWER MEADOW

Harlow Town Park Event (next to the bandstand)

SUNDAY JULY 8th 11am – 5pm

Join us and learn about the Wildlife that requires wildflower meadows to survive.

Taking part in this event will be the local Beekeepers, Badger, and Bat groups, information about how important wildflower meadows are as a source of nectar for the insects that pollinate our food crops.

And displays showing the maintenance work that is carried out by Harlow's volunteer groups in our woodlands, marshes, and meadows.

With guided walks taking place hourly from the event venue to our new Stort valley riverside wildflower meadow site.
